

Top 10 Benefits of Tetra Catalysts

1 Identify new use cases to uncover high-impact insights

2 Achieve faster, better implementation of scientific data solutions that enable all stakeholders

6 FTEs freed from manual data input at a global biopharma

3 Handle data across the entire value chain with an end-to-end solution

4 Follow best practices for replatforming scientific data to the cloud

5 Remove friction in data workflows through logically sequenced and unified processes

ONBOARDING TIME

2-3X faster onboarding of instruments at a large biotech

6 Minimize context shifting and errors via a dedicated and embedded team of Sciborgs

7 Ensure seamless data handoffs to maintain data consistency

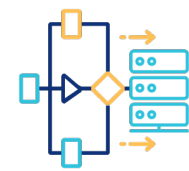

8 Lower your total cost of ownership with a scalable, cloud-based infrastructure adapted to your needs

1,000 hours per year saved for scientists at a multinational pharma

9 Reduce vendor and tool fragmentation via a comprehensive offering by a single partner

10 Build a strong data foundation for better scientific insights using advanced analytics and AI/ML capabilities
